Tubing Assembly for ASE® 200/300 Systems
cat.# 26251, 26248

Restek's tubing assembly for ASE® 200/300 systems eliminates the need for an adaptor fitting and allows \( \frac{1}{32} \) tubing to be inserted directly into either static or pressure relief valves. This simplifies installation and removes a potential source of leaks.

Installation Instructions

1. Remove the old tubing assembly and adaptor from the static or pressure relief valve. The adaptor is not needed when using Restek's tubing assembly for ASE® 200/300 systems (Figure 1).
2. Install the \( \frac{1}{16} \) tubing side of Restek's tubing assembly for ASE® 200/300 systems directly into the static or pressure relief valve, whichever applies (Figure 2).
3. Install the \( \frac{1}{32} \) tubing side of Restek's tubing assembly for ASE® 200/300 systems into the upper or lower autoseal tip, whichever applies.
